Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

In view of applicant's preliminary amendment received October 20, 2003, the specification has been amended, and claims 1-35 and 40-71 have been cancelled. An examination of claims 36-39 is presented below.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 36-38 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by US Patent 5,625,995 to Martin.

Claim 36:

Martin discloses an elongated sheet (Figure 2) of light gage metal comprising portions of reduced width that have apertures (52, Figure 2).

Claim 37:

A portion of comprises a grid of apertures with two rows of spaced apart apertures (central portion, Figure 2).

Claim 38:

The grid of apertures is at least six inches long, as the portion is equal to the width of the joist (26, Figure 3), which is at least 8 or 12 inches (column 1, lines 29-30).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 39 is rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 5,625,995 to Martin.

Claim 39:

While Martin fails to disclose that that the grid has at least twenty apertures, the number of apertures is a matter of obvious design choice to one of ordinary skill in the art, as deemed necessary to offer fastening locations (column 3, lines 52-58).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 6,374,558 discloses a beam comprising portions of reduced width. US Patent 3,423,898 discloses a rafter tie with apertured portions of reduced width. US Patent 2,704,868 discloses a metal tie with apertured portions of reduced width.
